ABOUT

I have always been interested in the web. I have developed projects on websites so far. You can reach my projects made with react and asp.net from the web projects repo in my Github account.

WORK EXPERIENCE

Web Developer Intern

SDM Research & Development | July-Sep 2021

- Create a education system website with PHP
- Develop web structures , forms , dynamic paging , article and video sharing system

EDUCATIONAL

Bachelor of Computer Science

Marmar Univertsity | 2019-Current

PROJECTS

React Image-List-App

A project that aims to take and display the pictures that come with an api request. Used API url request , binding , controlled and uncontrolled forms and communication between components . Tailwind used for css

ASP.NET Persenol Cv Website

I developed an application with a single page add, update, delete operations and an admin page.

ASP.NET Core Projects

Other projects that I developed while I was learning are a project with food and categories, a project with file uploads, the use of a text editor for articles.

Can check all projects on my Github
